

# SETTING UP FOR WEIGHING WITH EID, NO DRAFTING

These instructions describe how to set up the indicator for weighing with EID and FID being entered. The system may be optimised for weighing sheep or cattle.

## STEP 1:

Press  and set up the screen as shown:

*Note:* EID and FID are ticked. Using FID is optional depending on your requirements.

Weighing Screen Setup FILE: [REDACTED]	
Tick the items you want on the main weighing screen.

## STEP 2:

To select a file, press  then scroll to the new file.

*Note:* It is good practice to start a new file each time a new session is started. You should name the file relevant to the job you are doing. This is good practice for record keeping.

# SETTING UP FOR WEIGHING WITH EID, NO DRAFTING

## STEP 4:

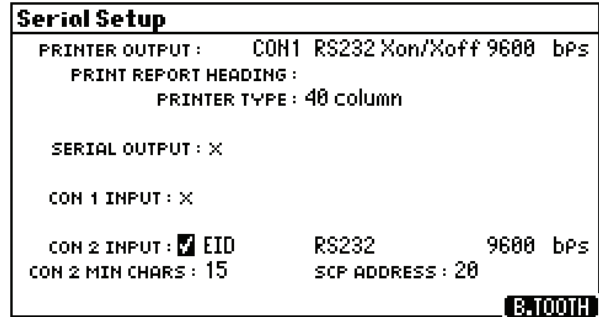

Set up the EID device.

Ensure the EID reader is plugged into CON 2.

Press , , **SERIAL**.

Set up the screen as shown:

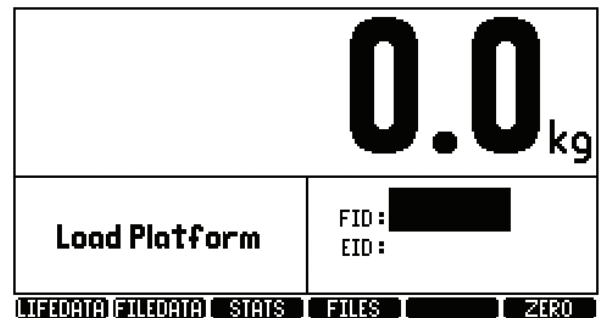

*Note:* This covers cable connected EID readers only. A Bluetooth reader has a different setups, see the relevant setup sheet.

## STEP 5:

The main Weighing screen should be displayed as shown:

You are now ready to weigh.

## STEP 6:

If the animals are being inducted for the first time you will get this pop up message for the first animal.

Choose "Don't show message again this session."
